

Best Practices 2021-22

1. Career Katta-

Objectives-

1. To create environment for students to study for competitive Exams.
2. To organize lecture series of IAS officers, entrepreneurs

Context-

Students in tribal area have very less exposure to the modern, advanced world. No doubt, they are having potential within them. To provide opportunities to this student to choose their career wisely, career Katta activity is run in the college. The information regarding different competitive exams has been imparted at very low fees of Rs. 365 for 3 years.

Practice-

Different activities/lectures are organized all the year through for the tribal and college students. Career Katta is an initiative by Higher and Technical Education Department of Maharashtra Government and Maharashtra Information Technology Support Centre.

The various online Ad-on Courses are conducted. Total 126 students of the college have registered total 1500 students have participated. college received second prize of Best College at SPPU,Pune.

Evidence-

The programmes are conducted online and offline. The lectures are available on app so that students can access it any time and at anywhere. This app is having 89,500+ subscribers and 6, 22,588 vies. Many students have been selected in different exams so far. **Problems**

Encountered-

1. Poor Internet connectivity, Poor economical condition, android Mob. Etc.

2. Title- Vaccination for Healthy Nation

Objectives-

1. To spread the awareness about covid prevention
2. To make the vaccination facility available in the campus for students. And vaccinate.

Context-

. College was closed due to Corona. Online teaching was conducted. In our tribal area, people were scared. They were unaware of prevention to be taken and also about vaccination. People were hesitating to get vaccinated because of rumors. Hence the practice of vaccination for 'Healthy Nation' was undertaken by college.

Practice-

College organized vaccination campaigns in the year 2021-22 in seven phases including two doses and one booster dose in Late K.B. Dada Deshmukh Auditorium. Awareness has been created by class teachers and PHC officer (Taluka Health Officer) and his team. Students, who remained, have been called for vaccination and are vaccinated.

Evidence-

College could achieve around 97% vaccination of students successfully.

Problems-

1. It was difficult to create awareness about vaccination as people were scared.
2. Few girls fainted at the time of vaccination due to fear, or hypoglycemia, but rest of the students thought it was because of Vaccination. Hence, they were not ready to vaccinate and tried to run away. Then it became quite difficult to convince them.
